Employment Rates: The employment rate is defined as the number of employed persons expressed as a percentage of the labour force where the labour force is those persons who were employed, or unemployed but looking for work. To determine employment rates of recent graduates, Ontario universities conducted a survey of all 2009 graduates of undergraduate degree programs. Graduates were asked questions regarding their employment situation six months and two years after graduation.

K2A. Key Performance Indicators, Degree Completion Rate for Undergraduate Cohort, Fall 2002, New Year 1 Students

Program	Graduation Rate
Business & Commerce	86.80%
Engineering	81.00%
Fine & Applied Arts	93.50%
Kinesiology, Recreation & Phys. Educ.	93.90%
Mathematics	73.50%
Medicine and Related Programs	99.30%
Nursing	92.20%
Other Arts & Science	80.40%
Other Health Professions	99.00%
Overall Average	83.50%
Total new full-time year one undergraduate students enrolled in fall 2002	4535
Total students reported above who graduated by 2009	3787

Graduation Rates: The MTCU has calculated graduation rates using a single entering cohort of students and determining whether or not they graduated within seven years. The methodology employed involves the selection of all new full-time, Year One undergraduate students on the official Fall 2002 enrolment file, who have a valid (and unique) student ID number, and were seeking either a bachelors or first professional degree. The subset was then matched against the records for students who received a degree (in any program) from the same institution during the most current seven year period (2002 to 2009).
